OUR STORY

Boot Hill Distillery's story begins with combining five generations of sustainable farming and quality, transparent distilling to create whiskies and other spirits that are uniquely our own. Founded by Hayes and Roger Kelman in 2014, as an extension of their own multi-generational farms, they saw opening a distillery as a way to add value to the corn, wheat, rye, and barley their family has grown for generations. Western Kansas's first craft distillery came to fruition in Dodge City, KS when a historic 1929 city building needed rescue from the wrecking ball. Atop the infamous outlaw cemetery bearing our namesake, our distillery, housed in the town's historic municipal building, sees a different kind of spirit inhabiting Boot Hill today.

VODKA

BOOT HILL DISTILLERY'S VODKA IS DISTILLED FROM HARD WINTER WHEAT GROWN ON THE WIND-WHIPPED FIELDS OF OUR OWN FARMS.

Following an initial pot-distillation, our vodka passes through a second, eighteen plate, column still distillation ensuring a crystal clear and clean spirit. A final, slow charcoal filtration brings a bright and crisp profile to the finished spirit.

Using the highest quality grains, and control over the entire process, this premium vodka sets a new standard. But don't take our word for it. The American Craft Spirits Association agreed when they awarded our vodka the only gold medal and Best of Glass in 2020!

NOSE

Exudes a flowery nose of sweet gardenia, vanilla bean, and pink grapefruit.

NEAT

Its approachability is immediately noticed with a malty softness and cream-like flavors of wheat cracker, cracked peppercorns, and subtle cranberry

ON THE ROCKS

The initial cream flavors deepens, with a soft, malty flavor spreading across the entire palate. Peppery notes dissipate, but linger on the end.
